## Great Majestic

### The economy of the best range

Every bread-baking that fails every cake that falls, adds to the excessive cost of a cheap range. The range that will produce the best results is the most economical. The Majestic gets more baking results because the heating is distributed evenly over all parts of the oven, and is reflected onto the baking by the asbestos lining, thus baking evenly, without turning. Sure baking means economy of both food and fuel. The heat cannot escape because the oven is hammer riveted and requires no putty. Heat being retained, less fuel is needed to maintain even baking temperature. Better baking with less fuel is double economy.

The Majestic is made of malleable iron for strength and durability for long-lasting—a combination that cuts repair bills and insures long service. Preparing better food, with less waste, and less fuel and fewer repairs, over a long period of years, is triple economy. That makes the little extra you pay for Majestic quality and service return big dividends. The Majestic has many improvements that lighten the labor of cooking and add to its durability. Even a minute examination of a Majestic will tell you more than a hundred words. You ought to see the Majestic.

Call at our store real soon and give us the privilege of demonstrating the many Majestic advantages.
